Course Evaluation

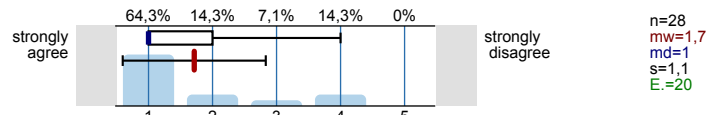

The course was well structured.

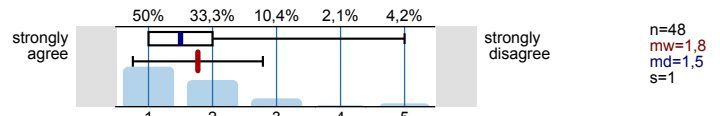

The choice of topics was well explained by the instructor.

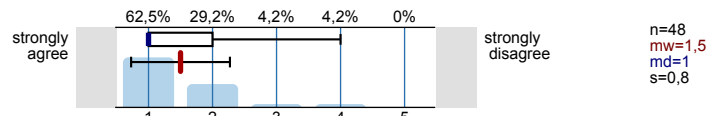

Recommended reading materials were useful in facilitating understanding of course content.

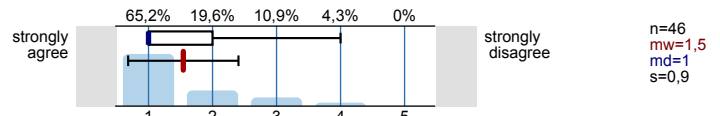

Instructor was well prepared.

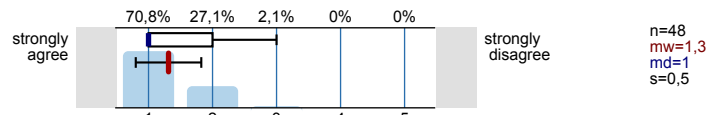

Instructor provided the opportunity for discussions and questions.

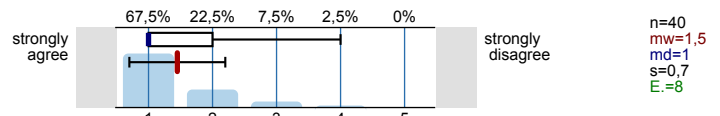

Answers given by the instructor were helpful in clarifying uncertainties.

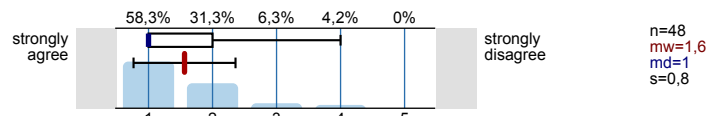

Instructor's manner of speaking was clear and audible.

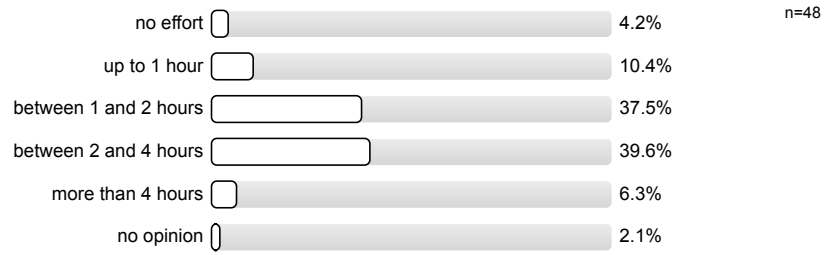

Course details were announced in time.

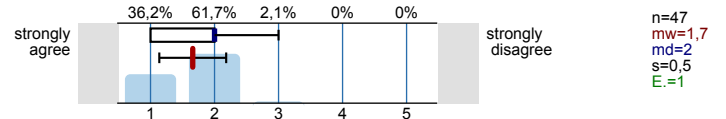

The course has helped me expand my knowledge of the topic / field

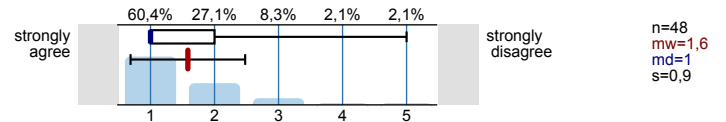

How much effort did you put into the preparation and wrap-up of the weekly course sessions?

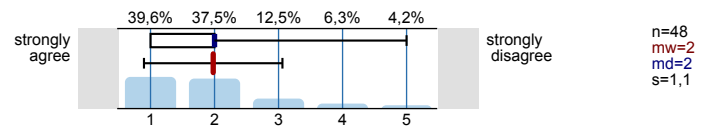

The course content was difficult.

The teaching was good.

Overall, I am satisfied with the course.

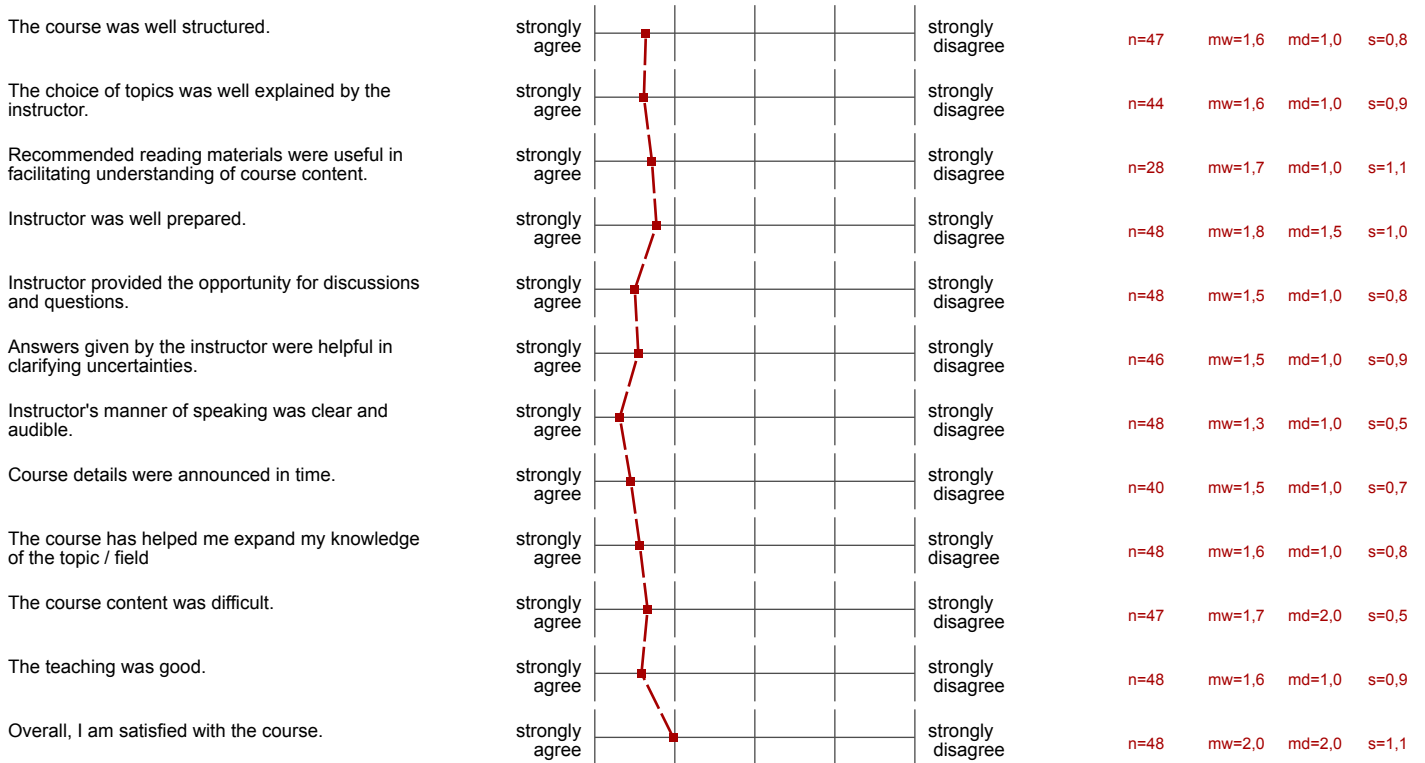

Profillinie

Teilbereich: Master Economics
 Name der/des Lehrenden: Master Economics
 Titel der Lehrveranstaltung: BE 510 Business Economics I (Reuter) HWS 2019
 (Name der Umfrage)

Course Evaluation

What did you especially like about the course?

- Better than the other exercise classes
- Free approach of discussing the exercise sheets
- Good explanation of the content
- Good explanations, was very helpful in solving the presneted problem sets on my own afterwards
- I liked that Marco wrote down the answers in detail while explaining as you had time to copy and it was not too fast and you stayed focussed. He seems to know what he's doing and competent.
- I really appreciated short additional explanations. Good additions to the lecture.
- It helps me better understand the concept not well understood in the lecture.
- Marco is a very good tutor, really liked the tutorial!!
- Marco was always very organized. He explained concepts very well and in an understandable way. I especially liked how at the end of each exercise class he would mention the key takeaways from the lesson. Overall great instructor!
- Marco's easy-going/approachable but still professional style of teaching.
- Mr. Reuter was the friendliest of all tutors and was really patient with our questions and requests. He showed great commitment
- Room for discussions in exercises.
- The exercise helped my understanding of the course content.
The uploaded solutions were of high quality.
There were various different exercises offered.
The lecturer did not hold the exercise course, so the content was explained differently in the exercises (different wording, not different meaning).
Marco was available for questions both while and after the exercise and was able to explain the questions asked.
- The exercise instructor did a very good job and always explained why he emphasized on some tasks and left out others. I like that he did not only read out the solutions but tried to really foster our understanding of the topics and of how to approach the individual tasks. Furthermore, I liked the usage of the tablet as this is much more appealing than the old overhead projectors!
Thanks a lot to the exercise instructor as he really helped me in understanding the subject!
- The instructor seemed well prepared
- Thinking strategically
- Tutor and professor with very good pedagogical skills
- Very well structured explanations, adequate pace

What could/should be improved?

- -
- - no communication between the tutors, one tutor made clear that the style of answers the other tutor teached us would be not sufficient
 - monday session was not prepared; lots of mistakes done in exercise class
 - could not give us the full picture of the topics at all
- 30 mins longer for some exercise classes (or fewer exercises) would be useful.
- Calculations were partly skipped due to lack of time and standard solutions not always helped my understanding (too little explanation on why and how things were done)
- Clarity of the solutions provided,
Length of the problem sets so that they can be solved within the 90 minutes
- For some reason the Wednesday class was better structured and prepared than the Monday class
- Make the relationship between all the concepts clearer
- Marco should add more structure to the course.

The other exercises were ununderstandable, in my opinion, so the most important thing to improve is to find qualified tutors (Marco was good)!

- Nothing, he was great.
- Often, the tutors did not know exactly what was covered in the lectures and either did not touch all points discussed there or went beyond the topics -> better alignment of lectures and exercise sessions
- Relevance of course - content seems far from reality and not applicable to reality.
- Sometimes a little bit confused, but that can happen.
- Sometimes it was too much questions for the time, thus the instructor rushed sometimes a little bit through the answers. For some solutions, it was not clear where the formulas used came from (not discussed in lecture or videos).
- The handwriting of the teacher could be improved
- There were
 - lots of errors made during the calculations
 - unclear/no answers to questions ("Uh, I don't know right now, I have to check"In the end we often didn't know which solution was correct because he kept changing it, correcting it,... . It was pretty chaotic BUT still better than the other instructors.
- Too difficult and not explainable
